

Scott Creek Primary School SunSmart Policy

(Revised March 2017)

This policy applies to all school events on and off-site.

Rationale

A balance of ultraviolet (UV) radiation exposure is important for health. Too much of the sun's UV radiation can cause sunburn, skin and eye damage and skin cancer. Sun exposure in the first ten years of life is a major factor in determining future skin cancer risk.

Too little UV radiation from the sun can lead to low vitamin D levels. Vitamin D is essential for healthy bones and muscles, and for general health.

Objectives

This SunSmart policy has been developed to:

- encourage the entire school community to use a combination of sun protection measures whenever UV Index levels reach 3 and above (www.bom.gov or the Sun Smart App).
- work towards a safe school environment that provides shade for students, staff and the school community at appropriate times
- ensure all students and staff have some UV radiation exposure for vitamin D
- assist students to be responsible for their own sun protection
- ensure that families and new staff are informed of the school's SunSmart policy.

Staff are encouraged to access the daily sun protection times to assist with the implementation of this policy.

The school uses a combination of sun

protection measures for all outdoor activities during terms 1, 3 and 4, and whenever UV levels reach 3 and above at other times.

1. Clothing

Sun protective clothing is included in the school uniform/dress code and sports uniform. The clothing is cool, loose fitting and made of closely woven fabric. It includes shirts with collars and elbow length sleeves, longer style dresses and shorts and rash vests or t-shirts for outdoor swimming.

2. Sunscreen

- Students provide their own SPF 30 or higher broad spectrum, water resistant sunscreen (the school will have this available if needed for staff and student's)
- Sunscreen is applied at least twenty minutes before going outdoors and reapplied every two hours if outdoors for an extended period.
- Strategies are in place to remind students to apply sunscreen before going outdoors (e.g. reminder notices, sunscreen monitors, sunscreen buddies).
- With parental consent, students with naturally very dark skin are not required to wear sunscreen to help with vitamin D requirements.

3. Hats

All students and staff are required to wear hats that protect their face, neck and ears e.g. legionnaire, broad brimmed or bucket hats, whenever they are outside. Baseball or peak caps are not acceptable.

4. Shade

- A shade audit is conducted regularly to determine the current availability and quality of shade.
- The school council makes sure there is a sufficient number of shelters and trees providing shade in the school grounds, particularly in areas where students congregate e.g outdoor lesson areas and popular play areas.
- The availability of shade is considered when planning excursions and all other outdoor activities.
- Outdoor activities are scheduled outside the peak UV radiation times or in the shade where possible.
- In consultation with the school council, shade provision is considered in plans for future buildings and grounds.
- Students are encouraged to use available areas of shade when outside.
- Students who do not have appropriate hats or clothing are asked to play under the verandah or in the undercover area as designated by staff .

Staff WHS and role modelling

As part of WHS UV risk controls and role modelling, when the UV radiation level is 3 and above staff will:

- wear sun protective hats, clothing and sunglasses when outside
- apply SPF 30 or higher broad spectrum, water resistant sunscreen
- seek shade whenever possible.

Families and visitors are encouraged to use a combination of sun protection measures e.g.

sun protective clothing and hats, sunglasses, sunscreen and shade, when participating in and attending outdoor school activities.

Curriculum

- Programs on skin cancer prevention and vitamin D are included in the curriculum for all year levels.
- SunSmart behaviour is regularly reinforced and promoted to the whole school community through newsletters, school homepage, parent meetings, staff meetings, school assemblies, student and teacher activities and in student enrolment packs.

Policy review

The school council and staff regularly monitor and review the effectiveness of the SunSmart policy (at least every three years) and revise the policy when required.

Relevant resources

- **Sun protection times:**
The sun protection times show when the UV is forecast to be 3 and above. They are available as a free online SunSmart app for your mobile phone or as a free widget to place on your website via www.cancersa.org.au/sunsmart-apps, in the weather section of the newspaper or visit the Bureau of Meteorology website via www.bom.gov.au/sa/uv.
- **Ideas to promote SunSmart Policy:**
SunSmart posters, UV daily readings as classroom activities, hat monitors, crate SunSmart games, guest speakers, SunSmart policy included in 'Information' booklet and all new parents/staff/students' made aware of policy.

Date of next policy review: 2020
